

## Crown and Bridge.

Dr. Philip Galvan is known for his **meticulous attention to details**. During crown and bridge preparations, he will make sure that you are comfortable and armed with the knowledge about the whole process. The procedure is **completed in 2 appointments**. For the first appointment, a cast will be made to replicate your bite and on the second visit, the crown will be cemented to the damaged tooth. With proper care, crowns and bridges can last for many years.

Our crowns and bridges are **made to exact specifications required to last for years**. Even with **19 years of experience**, Dr Philip still employs the same techniques honed from his years of schooling. You will definitely walk away with a whole new smile that is as **natural looking as your own teeth**. It is because of this fact that we are able to stand behind our work. All work is **guaranteed** for one year.
